You Know the Principle

Evidence-based design research connects a relaxing environment with a successful healing experience.

A clean, functional space softened with natural materials, comforting colors and filtered light invites convalescence while accommodating the necessities of clinical care.

Creating an environment which evokes the comforts of home can lead to improved patient outcomes, while making the healthcare workplace an attractive and welcoming location for all.
The Answer is 3form®

Infusing the aesthetics and sensitivities of the hospitality business into the healthcare environment combines the best of both worlds — functional spaces defined by inviting materials. 3form translucent Varia Ecoresin® and Pressed Glass™ turn a potentially austere healthcare facility into an inviting, relaxing space for healing.

“I heard visitors remark ‘Oh my gosh, it looks like a hotel.’ Strangely enough, that is a goal for us.”

ERIN COUCH  CLARK/KJOSS ARCHITECTS
“We want to lighten it, brighten it…make it look like a hotel”

RAY MORIN  METHODIST WILLOWBROOK HOSPITAL

Evolving the Standard

3form® unleashes ingenuity by offering flexible, customizable tools like Varia Ecoresin® to develop unique healthcare interiors that are functional and patient-friendly — all while helping you meet your clients’ budget and timeline and giving them the competitive edge they need in today’s healthcare industry.
3form Ready to Go solutions can drastically compress timelines, providing convenient pre-packaged solutions. Materials, hardware, lighting, CAD files and more – it all comes together in one simple combination.

300 | Wall Features
Packaged wall feature components are simple to specify, yet painless to personalize.

Juggling Priorities

Making a large-scale institution feel warm and inviting while maintaining a professional atmosphere requires thoughtful planning and the right tools.

Bathing areas in light while maintaining privacy is a balance that can only be struck using the right materials.
“With 3form, we get our modern flair, and our clients get their ‘home-like’ feeling.”

GRAYSON GANT INTERIOR ARCHITECTURE & DESIGN, PLLC

Discover the Ideal

3form® provides a vast collection of versatile, nature-infused materials like Thatch, Ting Ting, and Bamboo Rings to meet specific design needs.

Integrating translucency, color and texture with operational needs allows patients to feel the confidence and comfort that stimulates healing, and allowing medical professionals to get their jobs done.
“In the NICU application we used 3form to soften the impact of a critical atmosphere as it serves as a positive distraction for the parent and visitors.”

You Know the Paradox

You’ve faced this conundrum: developing a space that’s simultaneously open and closed. Providing common areas that are uncommonly airy while preserving the privacy necessary in a healthcare environment.

And it usually comes down to light.
We Use Light to Your Advantage

The incomparable assortment of 3form® materials encourages you to play with light with powerful effect—opening up healthcare spaces while allowing patients the discretion they need. Keeping it confidential without being constricting. Building areas of sanctuary that don’t feel like tombs. And developing appropriate separation without creating isolation.

HIPAA requires privacy. 3form meets those demands and creates a design-driven space.

You Know the Demands

It’s a tall order: beautiful and sterile, captivating and clean. All in one design.

The healthcare setting poses unique challenges—how do you render a space that is tough, tasteful, and resistant to contagious impurities?
Hotels and hospitals have the same durability issues. People are in a foreign environment and want to be comforted.

ERIN COUCH  CLARK/KJOS ARCHITECTS

We Know Resins

Smooth, resilient 3form® materials are ideal for maintaining the clean, sterile environment necessary to meet healthcare standards. Our robust Varia Ecoresin® is smooth and sanitary, helping your clients accommodate strict new laws regarding Hospital Acquired Infection (HAI).

Our heavy-duty, relatively light-weight Varia Ecoresin is a rugged translucent resin that provides up to forty times the impact resistance of glass — yet is half the weight of its traditional counterpart. Durable. Clean. Beautiful.

We Look Forward

3form is continually developing materials, options and services to facilitate your far-reaching visions as they become realities.

Our prescient products move beyond simply dressing a space—to transporting, educating, and even entertaining those who spend their precious hours inside healthcare facilities.

The future is about establishing deeper engagement with inhabitants to promote patient healing, family support and staff fulfillment via thoughtful control of the environment.

Not just building structures . . . building relationships.

Transcending Today

About 3form®

BREAKTHROUGH PRODUCTS
From materials that break the mold, hardware solutions that simplify installations, to one-stop solutions that provide instant design possibilities, 3form has created a breadth and depth of offerings that make the connection from inspiration to installation seamless and uniquely yours.

COMMENDED PEOPLE
3form employees are a passionate, dedicated and knowledgeable group ready to assist you with simple design specification as well as the most complex custom design solutions. Our cross-functional team of trained architects, material engineers, and project experts, familiar with the unique properties of 3form materials, will realize and expand your innovative vision.

BEETTER PLANET
Exceeding industry expectations, 3form has distinctively aggressive goals for minimizing the impact of not only our products, but our processes. Our Path to Zero goals are a commitment to continually reducing our overall environmental footprint toward the ultimate goal of total sustainability.

Please visit 3-form.com/about for more information.
