- a) Select the component
- b) Go to properties tab, Material and Finishes section
- c) Change the material

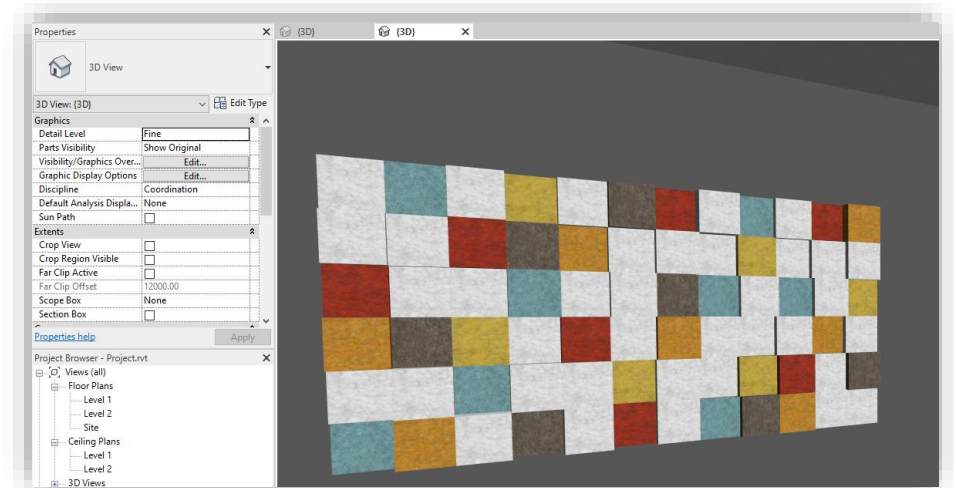

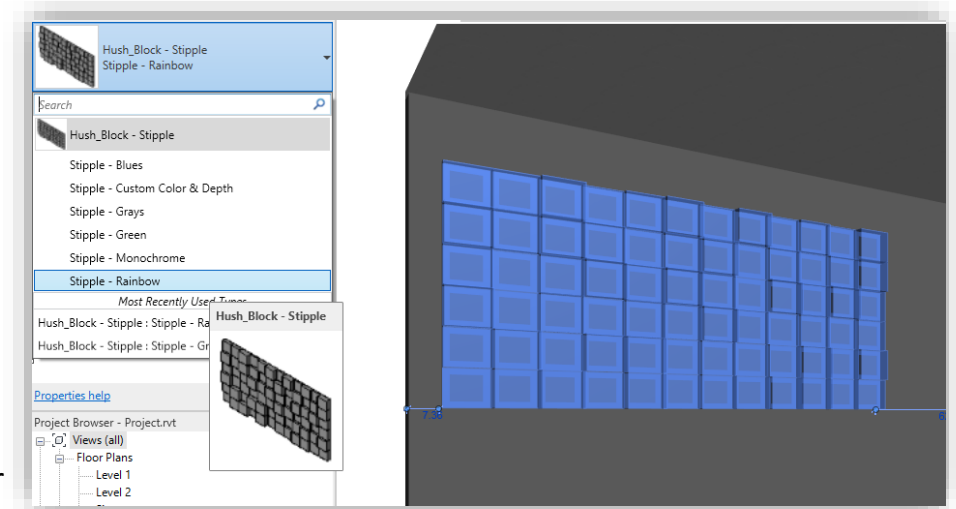

Browse
for
available
size and
shapes

Hush Block – Stipple (Sample)

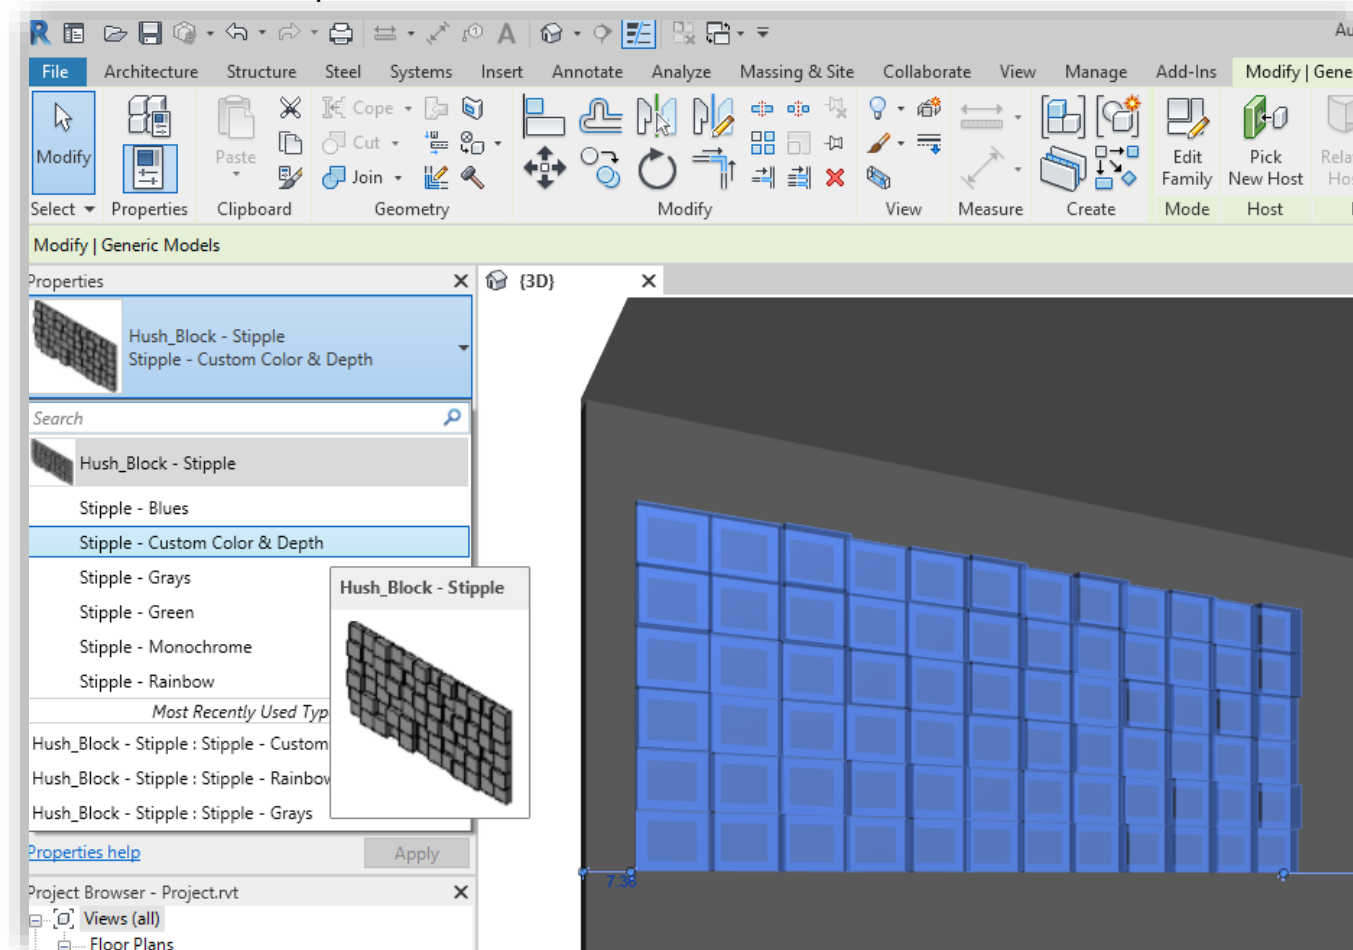

1. Open project, Go to Insert tab > Load Family > Browse for “Hush_Block - Stipple” > Click Open
2. Go to Architecture Tab > Component > Place a Component
3. Place the designed component on the wall
4. You can simply browse and change for the inbuilt design types named as follows:
 - a) Blues
 - b) Grays
 - c) Green
 - d) Monochrome
 - e) Rainbow
5. Another design is made and named as “Custom Color & Depth”, this is meant for the end user to change the depth and shades of blocks as per their requirement.

Hush Block – Stipple (Sample)

Steps to Use Custom Color & Depth Model

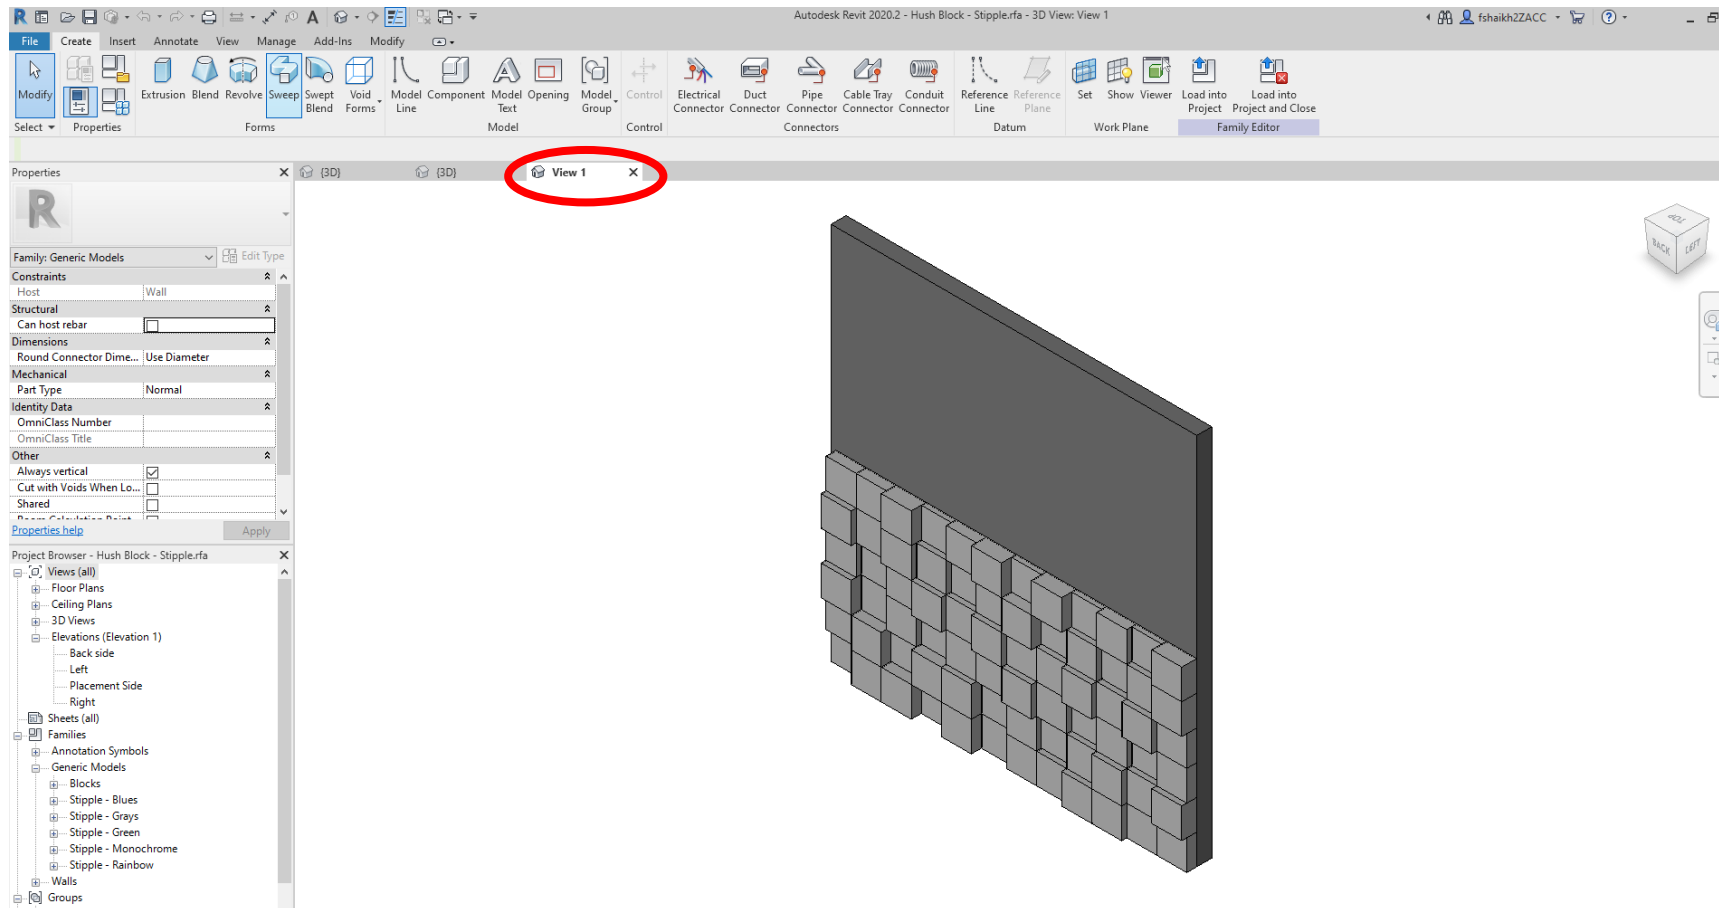

1. Place the component “Stipple – Custom Color & Depth”
