

# Standard Finishes

A collection of finishes designed to enhance the appearance and performance of 3form® materials. In most cases finishes will be applied to the front and back surfaces of a material.

**Stucco** F06  
*Varia, Koda XT*  
 A durable finish with pebbled texture.

**Grid** F09  
*Varia*  
 Fine, horizontal crosshatched lines create a robust texture.

**Sandstone** F01  
*Varia, Koda XT*  
 A subtle diffusion effect with light texture and durability.

**Vellum** F04  
*Varia, Chroma, Koda XT*  
 A durable brushed matte finish that adds a subtle texture to our materials.

**Grain** F08  
*Varia*  
 A translucent wood grain pattern that runs parallel to the length of the panel.

**Velvet** F07  
*Varia*  
 A durable, blurred finish with a crushed velvet pattern that runs parallel to the width of the panel.

**Supermatte** F05  
*Varia*  
 A frosted matte finish that assists in light diffusion.

**Patent** F03  
*Varia, Koda XT*  
 A high gloss finish with the highest light transmittance available; with an antique glass effect.

**Patina** F02  
*Varia*  
 A non-glare finish with a smooth appearance.

# Premium Finishes

Limited compatibility within material platforms, may have a longer lead time, and price premium.

## Renewable Matte

*Chroma*

This sanded finish hides scratches, is durable, and can easily be renewed in the field.

F10

## Satin

*Infinite Glass*

An etched finish that provides diffusion and privacy without an overly frosted appearance.

F14

## Writeable

*Varia (use with Color Portfolio & Digital Printing interlayers only)*

This functional finish allows you to write on the surface with any standard markerboard marker.

F18

# Finishes Overview

## Standard Finishes

	Varia				Chroma (Renewable Material)				Koda XT				Glass

<b>Patent</b> F03	1	✓	✓	✓	1*				1		✓	✓	
<b>Patina</b> F02	1	✓	✓										
<b>Renewable Matte</b> F10					3*	✓	✓	✓					
<b>Satin</b> F14													5
<b>Writeable</b> F18	2												

## Premium Finishes

\* Chroma is a renewable material (if renewed in the field, the resulting finish will always be renewable matte)

† Finish can only be on the back side

\* Finish not compatible with any surface-printed design (Graphic Patterns, Painterly, 2-sided Wood)

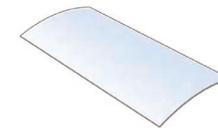

## Durability Rating Key

Durability comparison only within material type.

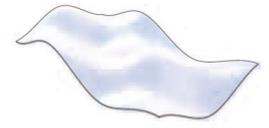

**1–2** | Specify for use only in applications where contact with people and/or objects can be minimized or eliminated, e.g. ceiling features, artwork, etc.

**3** | Specify for use in all but 1) the most demanding applications, or 2) when finish durability is the primary/driving requirement.

**5** | Specify for use in the most demanding applications, such as canopies, wall cladding, high traffic areas, etc.

Simple Radius Forming

Multi-Plane, Complex Forming
